

DISENFRANCHISED VOTER COVER UP AT THE MONTGOMERY COUNTY OHIO BOARD OF ELECTIONS FINALLY EXPOSED

Director Steve Harsman and Deputy Director Betty Smith Never Reported Their Mistake of Failing to Provide Over 600 Provisional Voters a Full Ballot.

During the November 7, 2006 General Election at least 600 provisional voters were not given a complete ballot by the Montgomery County Ohio Board of Elections. Provisional voters are registered voters who vote in a precinct that does not have their name on the voter roles because they moved and did not update their voter registration address prior to the election and are registered at their "old precinct". This was never reported by the Director (Steve Harsman) and Deputy Director (Betty Smith) because they feared a "Florida like disaster" and did not want to lose their jobs and most likely face criminal charges. The following is an explanation of how this happened and how it can be verified.

What Happened

The November 2006 General Election was the first election that a two-page paper optical scan ballot was used in Montgomery County. The ballots in question were the same type of paper ballots used to vote absentee voters but were used to vote provisional voters at the polls on Election Day. The voters were given no notification by the Board of Elections that the ballot would be two pages instead of one. The poll workers were given no instruction from the Director and Deputy Director that voters voting by provisional ballot would be using a two-page ballot and must be issued both pages of ballot.

The end result was that poll workers failed to give over 600 voters page two of the ballot and over 200 voters that were given page two of the ballot and never given page one. By law all voters must be issued a full ballot.

The document is an official post election ballot inventory completed by the board of elections after every election called the "last ballot issued" report used to verify all optical scan paper provisional ballots used or unused in the election were accounted for. This information is then reviewed and verified by the Director and Deputy Director. The numbers on this official and accurate document show that hundreds of voters were never given both ballots. The handwriting belongs to the election operations department manager who was in charge of the election operations department and reported directly to the Director Steve Harsman and Deputy Director Betty Smith. Steve Harsman is ultimately responsible for supervising all aspects of the election operations office.

The Director and Deputy Director are ultimately responsible for verifying all ballots used or unused in every election were properly handled and accounted for so there is nothing they could hide behind on their responsibility in this situation. The Director and Deputy Director personally supervise the counting of provisional ballots and verify ballot tabulations are correct. They cannot claim they did not know anything about this because it is their job to know. This incident was covered and intentionally not reported because they knew it would be the end of their careers at the very least.

Proving the Case

There are publicly available election reports etc that can be requested that will prove all the information in the attached document is true. The Board of Elections can easily provide a precinct by precinct ballot counted report showing how many page one and page two provisional ballots were counted in each precinct. The numbers on the report will match the numbers on the included last ballot

issued report. Ballots from that election are also required to be stored for a fixed period of time. If the ballots are still in storage they would also match the information on the included document.

The Attached Document

The first page of the included document is an example page that will show you how to identify the ballot issuing problems on the entire document. Every first page provisional ballot in every precinct starts with the number 1001 and second page ballot starts with the number 2001. Poll workers gave the two-page ballot out in order starting with ballot 1001 for page one and 2001 for page two and must account for each ballot issued. If you look at page one, precinct Dayton 1-C or DA 1-C shows ballot 1011 was the last ballot issued meaning 11 page one ballots were issued to provisional voters and it shows 2001 as the last ballot issued for page two of the ballot meaning no voters were given page two of the ballot. This same problem shows up first in Dayton 1-A and in the precincts highlighted with boxes on the example page included. Any precinct that has last ballot issued numbers that do not match means a voter was issued an incomplete ballot. On the first page alone there are 155 voters that were never issued page two of the ballot.

The Concerned Election Workers of Montgomery County is a group of current and past employees of the Montgomery County Ohio Board of Elections committed to end current fraud and abuse by election administrators in our county.

EXAMPLE PAGE

Shows that 1011 was the last page one ballot issued meaning 11 provisional voters were issued page one of the ballot.

Last Ballot Issued
NOVEMBER 7, 2006 GENERAL ELECTION
Precinct Check List

Shows that 2001 was the last page two ballot issued meaning no provisional voters were issued page two of the ballot in precinct Dayton 1-C and all 11 provisional voters were denied the right to vote a full ballot. This pattern of voters being issued only half the ballot occurs in dozens of precincts in this election. Other examples of this problem are highlighted with boxes and occur on all six pages. There are 155 occurrences in just the first 90 precincts of voters never being issued page two of the ballot.
